Write Js Programs To Solve These Problems

1- Check The Number Is Even or Odd
2- Fizz Buzz Game
3- Reverse String for example welcome => emoclew
4- Compute Circle Area and Circumference
5- check two given numbers and return true if one of the number is 50 or if their sum is 50.
6- check from two given integers, whether one is positive and another one is negative.
7- check whether a given positive number is a multiple of 5 or a multiple of 8.
8- find the largest of three given integers
9- Compute The sum of the numbers from 1 to 10
10-   display the pattern like right angle triangle using an asterisk.

    *
    **
    ***
    ****
    *****

11-   check whether a given number is positive or negative.
12-   store elements in an array and print it.
       Test Data:
       Input 10 elements in the array:
       element - 0 : 1
       element - 1 : 1
       element - 2 : 2
13-   print the sum of two numbers
14-   calculate the factorial of a given number
       Test Data :

Input the number : 5

Expected Output :

The Factorial of 5 is: 120

15-   Create Simple Calculator (+ , - , * , /)

Good Luck 😊
